

# Environmental Policy Statement

---

Protecting our shared environment is of fundamental importance to our Company as it is to our employees and customers. To support this common goal we will:

- Comply with applicable local, state and federal environmental regulations.
- Continually improve the environmental performance of our products and processes.
- Use natural resources, including raw materials, energy and water, as efficiently as possible.

We will work to achieve these commitments by:

- Requiring environmental awareness training of all our employees and more specific environmental training where appropriate.
- Evaluating products and processes from the point of view of chemical risk, dedicating ourselves to finding better alternatives based on preventing pollution in the first place.
- Considering the risks of our raw materials and products at all stages of our product's life, placing priority on risks present during our production process and during our customers' use of our products.
- Working collaboratively with our customers, suppliers, and the surrounding community on environmental issues.

We will make every effort to ensure that environmental performance is an integral part of our performance and of the performance of all of our employees. To this end, we will periodically review and report on our progress in realizing these commitments.
